<input type="checkbox"/> Other	<p>Is your well used for irrigation? If yes, please indicate how many acres (estimated) that you irrigate. No, it is not used for irrigation.</p>							

Please describe:	Shared private well for domestic use of three (3) homeowners.
------------------	---

**Applicant Information (continued):**

Reason for applying:

My interest in contributing to the development of well-designed, effective local groundwater sustainability plans is primarily motivated by the preservation of our shared private domestic well and to ensure what I hope will be the same plentiful, quality water available to our area for future generations.

Beyond this oversimplification lies an intensely complex issue that will require communal participation in planning from some distinctly polarized ideologies (as was evident at the Stakeholder and Advisory Committee Meetings)! That these plans must be based on the careful, strategic balancing of the physical realities of geology, hydrology and land use creates an additional set of challenges. I believe my interpersonal, negotiating, and problem solving talents would be an asset in this regard.
