

Santa Margarita Groundwater Agency Application Form for Well Owner Representative Alternate

The Santa Margarita Groundwater Agency (SMGWA) is the Groundwater Sustainability Agency established to oversee the development and implementation of a Groundwater Sustainability Plan for the Santa Margarita Groundwater Basin. The governing Board of the SMGWA is composed of 11 members:

- Two directors from each of the Joint Power Authority member agencies (Scotts Valley Water District, San Lorenzo Valley Water District, and County of Santa Cruz), each of whom are appointed by their respective elective bodies. Each agency has one alternate.
- One director each from the City of Scotts Valley, the City of Santa Cruz, and Mount Hermon Association. Each agency has one alternate.
- Two well owner representatives, that are members of the public and must be private/individual well owners, or a representative of small water system, farm, or business served by a non-municipal well. These directors may be self-nominated by reaching an agreement amongst all the applicants to have some individuals voluntarily withdraw their applications so that the remaining number of applications is the same as the number of vacant positions. The remaining will then go to the Board for approval. Failing that, the Board will select and approve an applicant based on the applications received. The well owner representatives have one alternate.

The SMGWA Board members oversee and direct the following efforts:

1. Facilitate development and implementation of a Groundwater Sustainability Plan for the Santa Margarita Groundwater Basin, as required by the Sustainable Groundwater Management Act of 2014.
2. Review data and coordinate groundwater pumping to the extent possible to meet demand and avoid exacerbating undesirable impacts.
3. Undertake ongoing and comprehensive efforts to collect, maintain, and share groundwater data with respect to water levels and quality.
4. Undertake cooperative research and resource management initiatives that are regional in scope and disseminate information resulting from these activities.
5. Recommend joint efforts to the respective governing bodies which are of regional benefit, e.g. conjunctive use, recharge within shared portions of the basin, etc.
6. Jointly pursue groundwater management grants or studies, such as planning or project grants available from the State under Proposition 1, and hydrological modeling and studies undertaken by USGS.
7. Board members are expected to communicate with their constituencies and represent the viewpoints and concerns of the constituencies that they represent.

All Board members are expected to adhere to the SMGWA Code of Conduct and act in accordance to the Bylaws and Guiding Principles, which can be found on SMGWA.org.

The Board is seeking to fill one Well Owner Alternate opening. The time commitment is expected to be 5 hours/month.

Applications are due by 5PM on Monday February 25th, 2019

Please direct questions and submit applications to Amy Poncato by email: aponcato@scwd.org or deliver to Scotts Valley Water District, 2 Civic Center Dr, Scotts Valley, CA, 95066.
